DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method or process for computing the value of a variable via a mathematical algorithm. The claims are not limited to a practical application of the mathematical algorithm because the result, which is the value of a variable, i.e. a number, is not a useful, concrete and tangible result. More specifically, the result is not a tangible result because it is not a real-world result.

Allowable Subject Matter

2. Claims 27-37 are allowed.
